Paper and Garbage Bag Pricing Increases

At Whisco, we strive to offer quality products at reasonable prices. With the pandemic and all of the related supply chain issues, our suppliers have been forced to increase pricing dramatically for paper products and garbage bags. Other product lines have experienced price increases as well, but these 2 product lines are the most

effected. You will see these increases in your new pricing as you place orders, and please do not hesitate to reach out to us if you have any questions or concerns. We are living through strange and unprecedented times.

Bug-Tek Pest Control

Bugs Got you Down?

Bug-Tek is an insecticide that is pet and human friendly. If it comes into contact with the skin or is swallowed or inhaled, its toxicity is greatly reduced. It is non-flammable and odourless. It also offers insect anti-fungal properties. Bug-Tek can be used inside the house or on the boat. The Bug-Tek formula breaks down quickly when in contact with living cells, but remains on inorganic surfaces for up to 6 weeks. The formula is safe for the user and the environment, targeting many common cold-blooded insects.
